## Lutron System Check-up

### *HomeWorks® & RadioRA® Systems*

We are pleased to offer this service to address the condition of installed Lutron Systems. We are committed to help our clients take advantage of new features for energy savings, optimal system performance and diagnose problems prior to inconvenience and outage.

#### Residential service includes:

1. Update Lutron System OS software & firmware.
2. Update current database with the most current software.
3. Perform detailed diagnostics to confirm performance of the current system.
4. Check all low voltage panel connections.
5. Securely store the most current database in case of equipment failure.

**Price: \$295**

#### Protected System Option:

Contract your next discounted check-up service and extend warranty for 1 year on component failures (parts only).

**Price: \$195**

#### Notes:

- Price includes one (1) hour of onsite evaluation and remote database review & data storage.
- Additional labor for programming changes and system repairs will be extended at a 20% discount.
- Panel directories & labels for existing panels & equipment is not included.
- Pricing subject to change without notice.
- Commercial pricing available upon request subject to a site visit.
- Prices may not be applicable to all residences including abnormal or non-functioning electrical systems.
