Whole-Home Surge Protection System

We are pleased to offer this program to protect a home's electrical system condition. We are committed to help our clients prevent needless systems repair, electronics replacement, and inconvenience.

Install whole-home surge suppression and filtering system. This system will protect and filter all incoming power. The filtering system will eliminate transient voltages created by internal and external fluctuations. The suppression system will protect all electrical equipment & devices. It will also protect printed circuit boards in other equipment such as ovens, refrigerators, and HVAC equipment that are not typically protected from electrical surges. Test the operation of the current grounding system and recommend corrections as necessary. The surge suppression equipment is rated for 50kA protection and has a manufacturer's 15-year warranty.

Residential pricing as follows:

- 200 amp service \$795
- 400 amp service \$1,590

Exclusions:

- Handling or removal of any hazardous materials.
- Installation of new wiring or circuits.
- Maintaining, trouble shooting, replacing or repairing any existing circuitry, devices and equipment.
- Balancing of new or existing phases.
- Panel directories & labels for existing panels & equipment.

Notes:

- Pricing subject to change without notice.
- Commercial pricing available upon request subject to a site visit.
- Prices may not be applicable to all residences including abnormal or non-functioning electrical systems.

High quality, single component assembly protects home's entire panel NOT just one circuit.
